Room 0.59, Fabrikstr. 24

Boost your quantitative imaging *Workshop*

This workshop will focus on some essential microscope tests to ensure quantitative results for:

- Sizes/distances measurement - *Resolution of your microscope (PSF)*
- Intensities over time – *Laser power stability*
- Intensities in a field of view - *Field uniformity*
- Object tracking - *Stage movement*

The workshop will consist in introductory lectures (9h - 10h30) followed by hands-on activities (11h - 17h30).

Application

Register via the QR code.

The number of seats is limited to 12.

Organised by the Microscopy Imaging Center (University of Bern) and the Facility for Advanced Imaging and Microscopy (FMI)
