

**Course:**  
**Individual project on microscopy related technical issues**

**Description**

PhD students of the Cutting Edge Microscopy (CEM) program are entitled to projects related to technical issues of microscopy. In general, this course is worth 0.5 ECTS and can be taken only once during the PhD program.

- Step 1: The student submits a proposal.
- Step 2: The CEM program directors accept this proposal. Adaptions may be requested.
- Step 3: The student carries out his project and hands in a written project description (2 to max 5 pages).
- Step 4: The student presents his project at a presentation event of the CEM PhD program. Here, the project is assessed and approved.
