

From Images to Results

Different image analysis tasks require different image analysis approaches:

- Routine or high-content analysis that requires an analysis as automated as possible that is server based
- Challenging images may require of a combination of AI and classical image analysis approaches
- Manual image analysis or diving into the image requires of a VR environment to really understand the 3D environment of the biological problem

Join this workshop in which we will discuss and have live demonstrations of different approaches to image analysis. **Participants are welcome to bring their images for analysis or exploration in Virtual Reality**

Speaker: Dr. Delisa Garcia

Date: 17th May 2022 from 10am – 5 pm

Agenda: 10 – 11 am Main seminar session. 12- 17 h Hands on

Location: University Bern – Institute of Anatomy, Buhlstrasse 26
Room A263

To participate: get in contact with Dr. Yury Belyaev
yury.belyaev@mic.unibe.ch or Dr. Delisa Garcia delisa.garcia@arivis.com
